

See what it's all about!

PostAgent

Hi! I'm Glint.

AUTHORS: Charley Reavley, Ryan Jordan, Alyssa Turenne, Kayla Fruean, Placide Ndayisenga, Stephen Adeoye

AI TEXT EDITING

CHARLEY REAVLEY - HIGH CODE CONDUCTOR - TEAM LEAD & AI ENGINEER

The text regeneration feature is present within the Pixie Polish page on PostAgent. It allows a user to collaborate with our AI chatbot, Glint, to make changes and improvements to the text of a post, ensuring it meets the user's satisfaction before being posted to social media.

PROJECT SUMMARY

PROBLEM

The problem of small business owners, entrepreneurs, and service providers lacking the time, expertise, and resources to effectively market their business on social media affects their ability to grow their customer base, build brand recognition, and maintain consistent engagement with their audiences.

SOLUTION

PostAgent delivers a beautifully simple, automated platform that generates, edits, and schedules branded content with minimal effort from the user. By keeping users engaged within this single tool, the system saves valuable time and energy, frees up resources, and helps businesses grow their digital presence more effectively. Our team enhanced the platform by delivering key features in usability and intelligent automation.

PERFORMANCE ANALYTICS

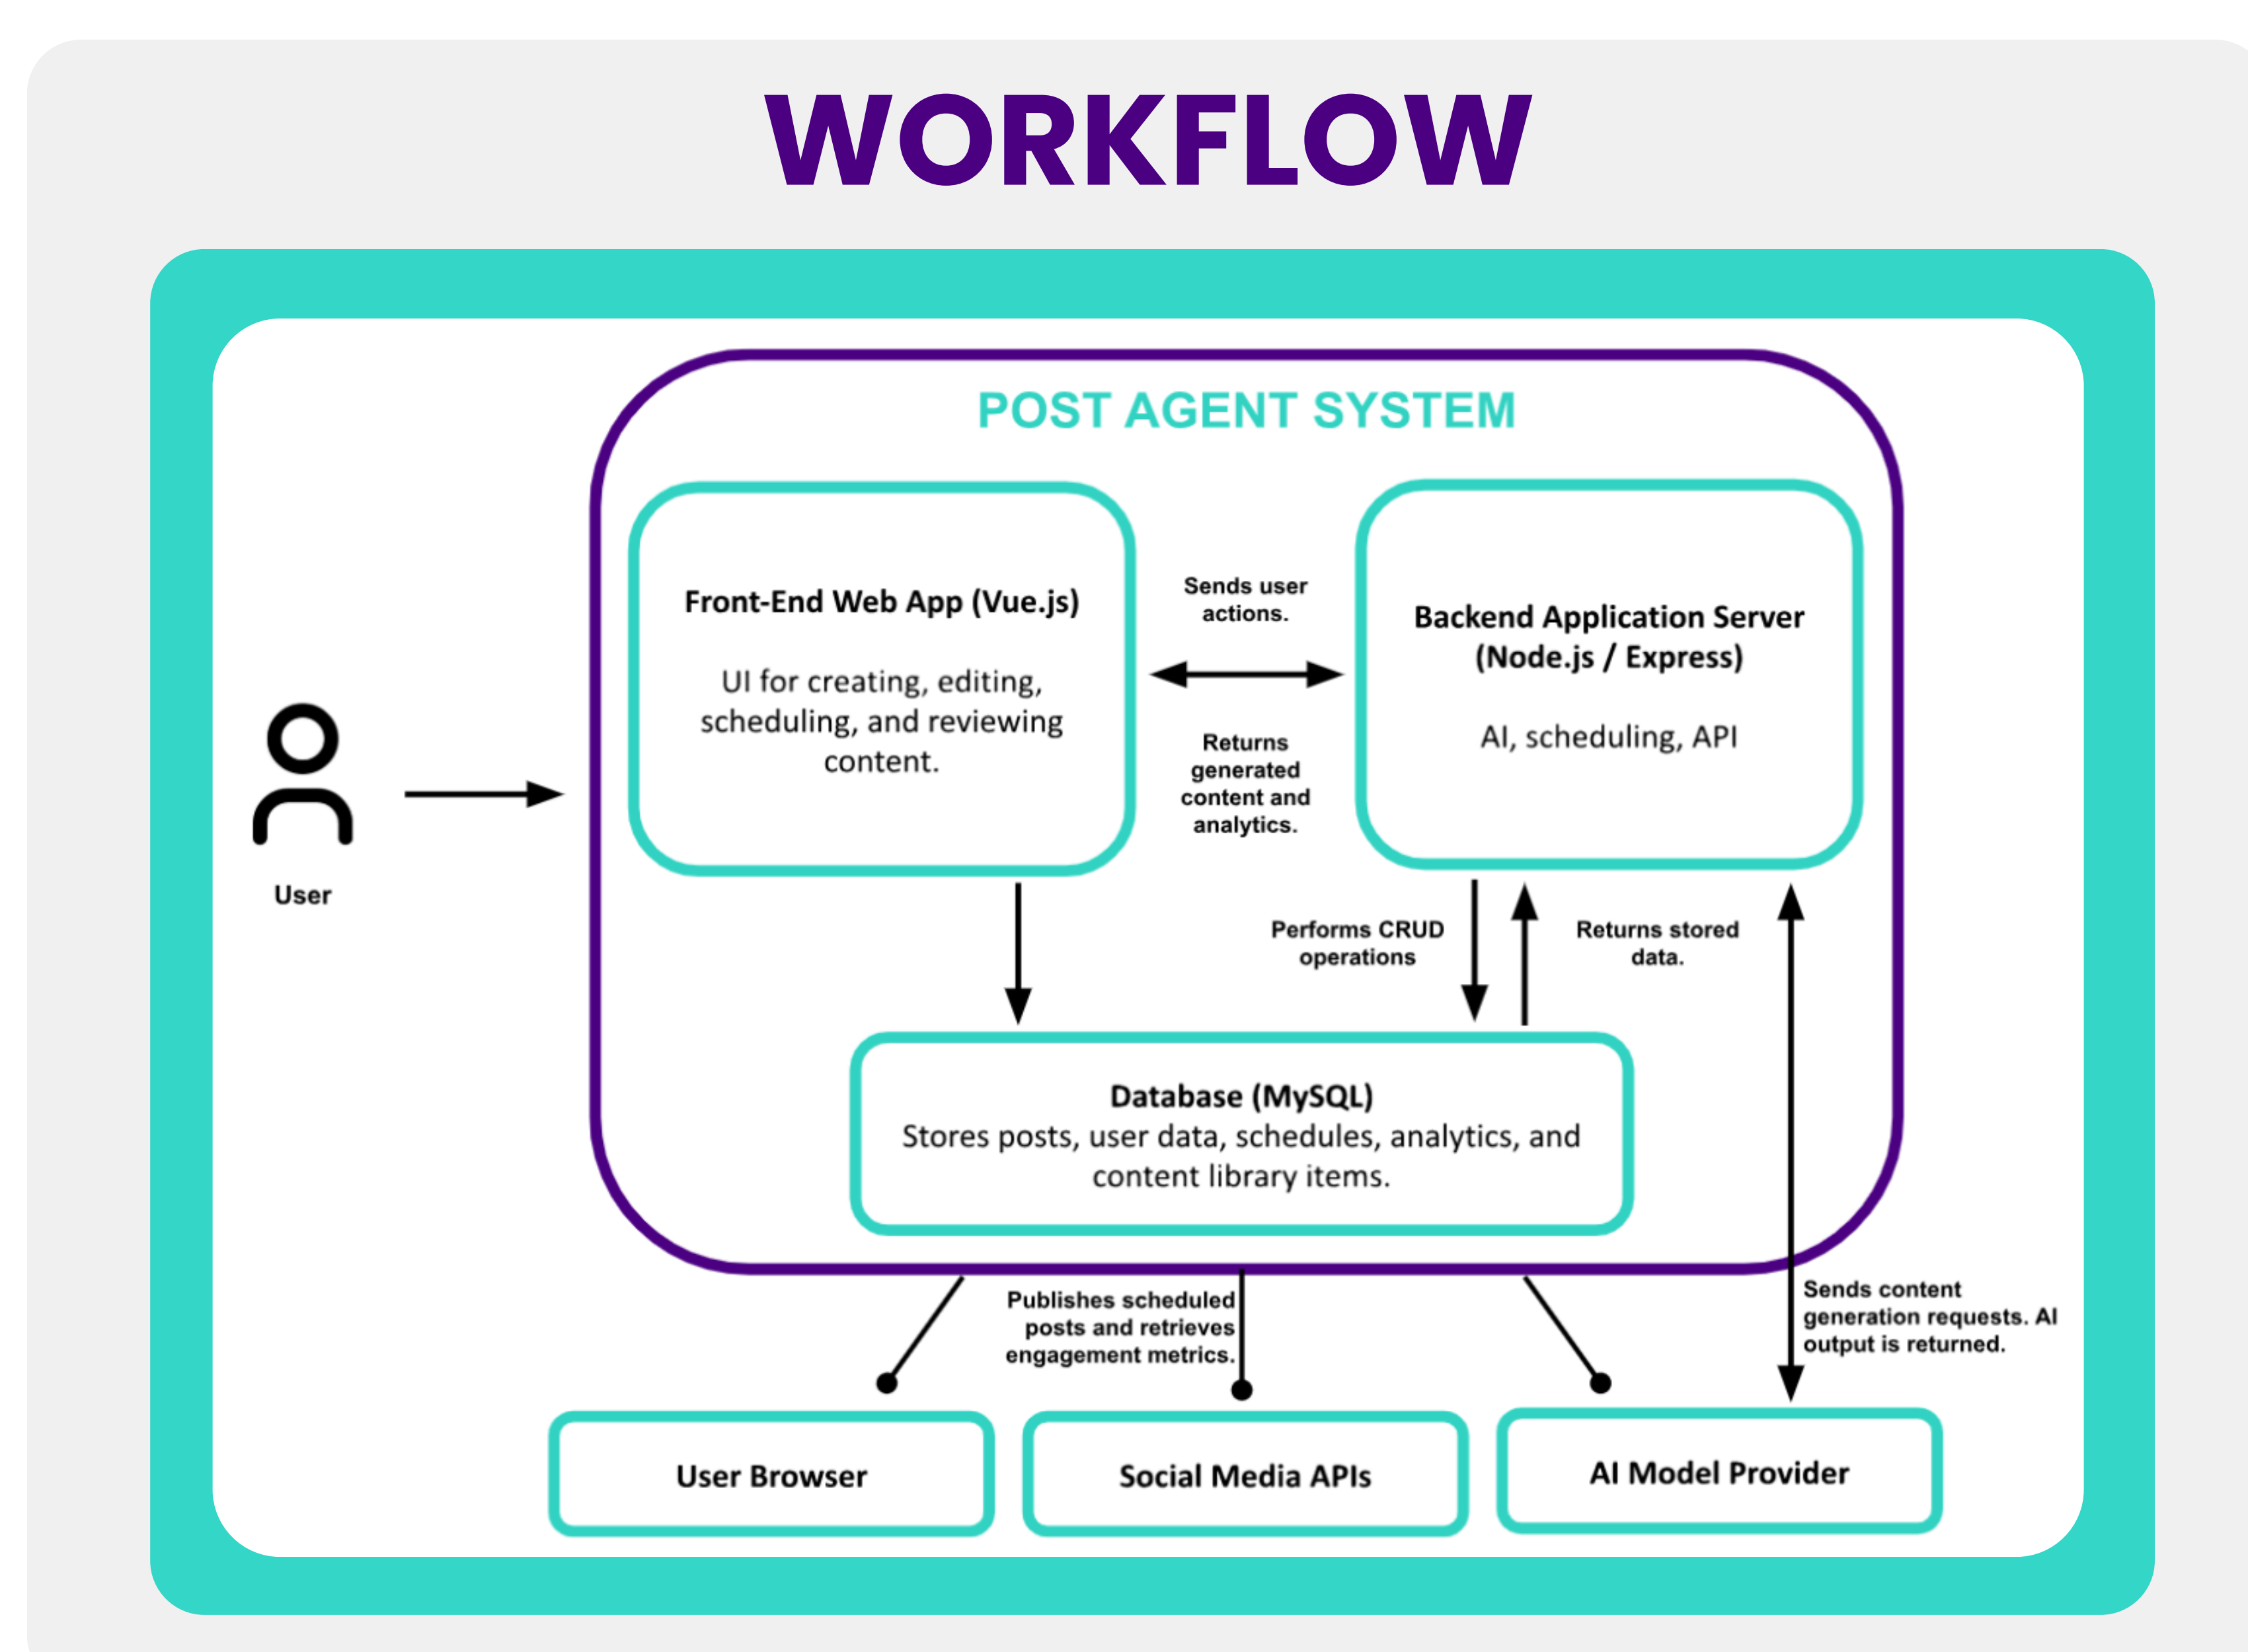

RYAN JORDAN - CRYSTAL METRICS SEER - SCRUM MASTER & DATA ENGINEER

Magic metrics consolidates the total performance of all posts create by PostAgent on specific social media platforms. It provides an overview, graphs and our own Performancey Prophecy which will use the power of AI to create insights into your posts and posting habits to help you improve your social media presence.

AI IMAGE EDITING

PLACIDE NDAYISENGA - COGNITIVE SPELLWRITER - AI SYSTEM ENGINEER

The Regeneration Image Chatbot focuses on updating and fine-tuning images that the user generated. It allows the user to chat or just select sidebar options or both, and then applies those changes to the image.

FRONTEND STYLING

ALYSSA TURENNE - ARCANES DESIGN CONJURER - UI/UX DESIGNER & ENGINEER

As the lead UI/UX Engineer, I focused on the Enchanter's Control feature which involved prompt engineering to create examples of different prompt types for the user, and fitting it into the UI. I also aided other teams, namely Performance Analytics, with UI/UX for their features.

COREVATION WEBSITE

STEPHEN ADEOYE - ARCANES WEB WEAVER - FRONTEND DEVELOPER

The Corevation website functions as the startup firm's straightforward frontend landing page, enabling consumers to explore the company's powerful products and get in touch with the organization.

TECH STACK

UI FRAMEWORK

Vue.js

BACKEND COMPUTE

Azure Function Apps (Python)

DATABASE

Azure Database for MySQL

FILE STORAGE

Azure Blob Storage (Media)

AI INTEGRATION

OpenAI LLM

MICROSOFT AZURE CLOUD

CONTENT LIBRARY

KAYLA FRUEAN - KEEPER OF INFINITE TOMES - DIGITAL CONTENT CURATOR

The content library allows users to view and download posted content, either individually or through a bulk download option, making it easy to access stored materials. The uploads page lets users view existing uploads and add new content, including videos, images, and text, providing a simple way to manage and expand the available content.

ACKNOWLEDGEMENTS

Thank you to our faculty advisors, Dr. Bingyang Wei and Dr. Ed Ipser, to our client, Dr. Niki Fowler, and to Sam Williams and Arushi Thakur, who assisted us throughout development.
